ACQUITTED AFTER NINETEEN YEARS. Touched by the frost of seventy years, old Jacon Staup, of Uniontown, Pa., finds himself at last out from under the shadow of a crime which has haunted him for ted, after standing trial for the third time, on a charge of murder. Twice he nad man would have to fear. been convicted, and the singular feature of the case is that the first of these trials occurred nineteen and the second eighteen scaped from jail, and up to last March, when he was finally apprehended, he re mained a fugitive from justice.

An old neighbor of STAUP in Fiyette County was the victim of the murder. There had been a feud between the amilies, and this fact helped to convict STAUP Since the twice condemned man escaped. eighteen years ago, however, his son has died, and a deathbed confession of the latter, in which he admitted himself to have been the murderer was one of the features of the third trial, which has led to the old man's acquittal.

The case is one probably without paral lel. Had Statte been taken to the scaffold on his first condemnation and the son's line remained scaled he would have died an innocent man and the law would have committed unwitting murder. That fortunate escape from behind the bars and the successful maintenance of liberty through long years has enabled the old man at to stand free and untrammelled. Perhaps, yes, even probably his years on earth will not be many more, but at least they will not go out under the sorrow and disgrace of terrible accusation and condemnation.

ARCTIC EXPLORATION.:

The steam brigantine Kite is ready to turn her nose towards the key North, bearing another exploring party to those high latitudes in quest of knowledge and of fame. Arctic explorations are always of deep interest to the world at large. Those solitary frozen stretches of the extreme North have witnessed repeated examples of human beroism, and they still lure plucky souls to their unknown sections.

Everything done in the interests of and determine its character and extent if borhood. possible. Arctic quests bring strongly into | Military engineers in Russia have recently made which cannot be escaped. Splendid examples of courage and endurance interest

The good wishes of everybody will follow the Kite. May it never fly low will follow the Kite. May it never fly low.

THE WOULD-BE FOREST GRABBERS.

The Adirondack railroad grabbers have lost nothing of their impudent assumption that they are eventually to get through the State forest lands with their rails, even in the face of the adverse decision of the Land Commissioners. They have issued a circular stating that the road will be completed and in operation in 1892, from Herkimer to Malone. They even give the list of stations to be established. which includes two located on the State land which it is proposed to cross.

The greedy corporation will not, however, find smooth work in carrying out its schemes. Already it has been warned that its civil engineers must stop cutting trees, as they have been doing under drinking was pretense that it was necessary to ac pape." curate surveying. A failure to heed this warning will result in an injunction which will bring the railroad work to an abrupt termination for a time. There seems no reason to doubt that the Forest Commission and the Attorney-General mean business in the matter and that they will keep a sharp eye on the would-be intruders and destroyers of the forest.

A Pittsburg lawyer tried to influence the Court in favor of his client who was apply-ling for a liquor license. The only thing said against the man are in the man are really such. against the man was that he gambled. Then his counsel said the Prince of Walls was something of a gambler himself. Whereupon the read American Judge promptly replied thr. ne didn't consider Walks a good character and that he wouldn't grant him a Boense. Isn't it a little silly to think that blackguardly things are retrieved by the fact that ALBERT EDWARD is addicted to them? That sort of thing is bad enough in England. It cannot get any show here.

A bad boy in General Sessions yesterday was sentenced to be talked to for an hour straight by his lawyer. And he won't have the ordinary juryman's privilege, under such circumstances, of going to sleep. There is still a good deal of severity connected with the administration of the law.

So long as men are what they are sym-

President of a bank, charged with em bezzling \$50,000 of the bank's money, seems to be getting more sympathy than he deserves, as there is difficulty in getting him indicted. Respectability, old age and position aggravate an offense of this kind instead of extenuating it, and justice should have full away.

"Now, here," he would say, "is a flower— its extracts were worth a good deal if the botamist kines "—and he'd crush is As if the poor thing couldn't feel!

"The water is talking," I tell him,
"And singing a song as it goes,"
"Tut, int's saith the Major (dissenting),
And keeps on destroying the rose.

"The trees with their beautiful hanners
Are drooped o'er the waters, "I say:
"Yes," "In this section
A sawmill would certainly pay!"

So I dream while he keeps on dissecting
Those dreams 'till no longer they please
He'd rain a world nill of roses
And cut down the last of the trees !
—Frank L. Star

The "See" Fiend.

Of all the men the most distressing, I am sure you will agree, Is that most obnoxious person Who is always saying, ""See ?"

Lest your intellect so feedle
May not group the truth he states
He this grim interrogation
Constantly interpolates.

"I said this and I said that. See?
They replied, see? thus and so.
Then I went and did this. Nee?"
That's the way his stories go.

If these fellows always "see "ing Gut what simply they deserte. There would be a swift destruction That would kill the optic nerve.

Then in total blackest blindness, they should pass elemnity.
White one million imps danced round them,
All lorever saying: "See?"—Beston Courier,

A Change of Heart.

A Change of Name.

I'm going to start a society to work against it

called the Detensive League."

1. H'm-you had better make a slight change in that name."
